

## **Celebration of the Wesak Full Moon with the Ascended Masters in the Wesak Valley (Himalayas)**

**- 30 April 2018, 01.58 hrs, Central European Time**

Let's close our eyes and sit comfortably. We take a few deep breaths and relax. Set the intention of connecting with all our brothers and sisters who are doing this visualisation wherever they are in the world.

We bring our awareness down below our feet and visualise big strong roots that are winding and spreading through the layers of the Earth all the way down into its core. Here they wrap themselves around a pure white diamond that sparkles and shimmers and anchors them.

The energy from the diamond is flowing and rising up along our roots, into our Earth Star

Chakra ... the Base... Sacral.... Navel... Solar Plexus... into our Heart ... up through the Throat ....Third eye.... Crown....Causal.... Soul Star ..... and Stellar Gateway Chakras and .....all the way to Source.

Source sends down a column of diamond white light. Visualise this flowing down through our chakra column, unifying all our chakras into one single chakra column. Then it continues down into the planet illuminating it with diamond white source light.

Our Antakarana is shimmering and sparkling with diamond light reaching from the core of the Earth, up into the Cosmos to Source. We are firmly grounded and aware of our beautiful special connection with our Creator.

Let's now invoke Archangel Michael to vest us with his deep blue cloak of Protection. We feel it and see it shimmering in a beautiful royal blue colour around ourselves.

We invoke the Spiritual Hierarchy. In particular we call forth Lord Maitreya, St Germain, Allah Gobi, Archangel Gabriel, the Unicorns and the Pure White Dragons from Orion for assistance with our sacred journey and our participation at the Wesak festival.

Visualise a pure white Dragon from Orion now with you in your room. The Dragon is enfolding you with his pure white energy and you start breathing this in ... and out ... into your aura filling it with the special light that he carries in his Soul, transmitting purity, clarity, enlightenment and truth to you.

You are now ready for your journey. Your pure white Dragon invites you to climb on its back . Then, he gently takes you up to meet with your brothers and sisters who are like you, on their way to the Wesak Valley with their Dragon.

As a group, we are now approaching the Wesak Valley at the foot of the Himalaya mountains. We can see an oval shaped rocky valley with high mountains on either side. Looking down we can see the disciples ,initiates and the whole Spiritual Hierarchy gathering. They have arrived from all over the Earth, and from all over the Universe for this important event.

We descend from our Dragons and we have a moment to greet and meet old friends, teachers and members from our group, and Masters ...

Silence falls as the Full Moon begins to rise in the night. We are all looking Northeast, towards a straight passage. Before the passage there is a big flat stone which emerges from the Earth onto which has been placed a great crystal bowl filled with water that shimmers in the moon light.

The three Illumined Lords have positioned themselves to form a sacred triangle with the stone and crystal bowl at its centre. The Christ Lord Maitreya at the summit, the Manu Allah Gobi on the right and the Mahachohan St Germain on the left.

We, together with the huge crowd are connected as one being, one consciousness, tuned in with the impact of the high frequency vibrations. The Full Moon reaches its zenith, and the three Lords are raising their hand. We are all excited with anticipation at the arrival of Lord Buddha.

In the distance we can see a small shiny point approaching ... as it gets closer it becomes brighter and we can recognize the figure of Lord Buddha in the lotus position arriving from Shamballah. He is wearing a saffron-coloured vest and he is immersed in light.

He has now reached the crystal bowl on the big flat stone and takes his place floating above it. He extends his hands to bless us all .... We all fall on our knees to honour Lord Buddha and the sacredness of this moment.

Lord Maitreya begins to chant a sacred mantra used only for this special occasion which celebrates the intense devotion and dedication of everyone to the Spiritual Hierarchy and to the Divine Plan.

Lord Buddha transmits to the Christ Lord Maitreya a cosmic energy which comes from the Heart of God. This energy circles from the Christ to the Manu and to the Mahachohan and into the water ... then to everyone present here.

See the bowl being passed round and visualise yourself taking a sip of the sacred cosmic water ... You know that you are a Walking Master representing the Spiritual Hierarchy on Earth. You are part of the Great White Brotherhood and you know your part in the Divine Plan. You stand firm in your power, holding your head high as you are sending the high vibrational energy, that flows through you into the planet reaching all there is .... and you know ONENESS.

You now have the opportunity to speak with the Masters that are working with you on your mission and discuss any issues you may have such as your next step, your direction or your focus. Relax and see who comes forward for you ... then take a few moments to converse and to receive a blessing..... Say thank you.

We bring our attention back to Lord Buddha who has started to rise into the sky in the lotus position ... travelling back through the passage towards Shamballa in the Northeast.

It is time to return. So look out for your pure white Dragon from Orion. He has very much enjoyed the ceremony and is very excited to point something out to you. He is holding up a magical mirror and you can see that you are holding the White Light of Integrity, Purity and Truth in your aura, and you can see your expanded wings of light.

You start flapping them, and as you look around you can see other members from our group doing the same. Much empowered and knowing that you are a Cosmic Being, you are now flying back with your own wings accompanied by the Dragon.

You are now back in the space where you started your visualization. With deep gratitude you thank the Dragon who has accompanied and supported you. Then you start moving, sense your big strong roots and when you feel ready you open your eyes with a joyful smile and awareness of the pure white light you are now holding and radiating.
